

Dear respected sir,

First of all I'm thankful to each and everyone participated in CSY43. I felt very happy be a part of CSY43.

This yatra is very helpful to me, I learnt a lot from this about our nature which is how much helpful to us.

I seen people living in their villages with very few facilities but they are healthy and happy.

They understand their surrounding nature very well and follow the nature in positive way without disturbing.

I'm thinking from my childhood living with nature without having much technology is very happy and healthy. After went to this yatra finally confirmed. Definitely in a few years I'll live in my village with nature.

In these days most of the people looking for lot of comforts coming from Western living, they are going to live like westerns.

They couldn't understand facilities provided by the nature are most by any technology will help us to live happy and healthy.

Brigadier Ganeshansir has a wonderful thought to start non profit organization for innovative people in a grassroots level. Thank you very much sir. And also thanks to

all support team Pallesrujana....

The lot of innovations by the grassroots innovators is really appreciated. I'll try to take their innovations to few more people to support them.

I'll discuss with my friends and families to participate in CSY next yatras.

Special thanks to Durga Prasad to took me to The Great organization yatra

Pallesrujana CSY43. And very happy to met Brigadier sir

Thanks to everyone

Best regards
K Sudheer Kumar
