

Many stories, motivational and inspirational started this yatra for me. I am going to be as brief as I can with each story I tell.

1. **Babu rao' drum seeder:-** This innovation need a special mention, if only we can get this kind of innovation for every village. Not only inputs cost comes down drastically, one can say that this can save a lot of environmental damage by using as many environmental resources in optimal ways. Farmer, environment, consumer everyone is in a win.
 - a. We might need awards for this innovation to properly pursue govt to supply this kind of innovations. Hopefully, this is already in pipeline.

2. **Shiva kumar's Jacquard_loom computerization:-** One needs to understand working of Jacquard_loom before understanding this innovation.
 - a. Disposing punch card for every design, with crores of designs in market. One can understand wastage of material and effort to re-do every punch card for a design in market.
 - b. Looking at innovation, understanding all this one can only salute and clap. What else can we say?

3. **Chandra sekhar's story :-**
 - a. Herbal cream against mosquitoes?
 - b. Herbal defense against nematodes who feed on food of plants?
 - c. Seriously, what else should we say about this man. These medicines are useful for a wide variety of patients, trees. Point is how can we reach everyone; how can we do our bit for ourselves.

4. **Narsimha's story :-**
 - a. Many a times we speak about industrial effluents causing problem to many of our lakes. We forget natural algae which is one of biggest head-ache for fisher men, life and death issue for many organisms in water.
 - b. Western part of India, west Bengal might be a good market for this product given these areas are very much dependent on aquatic life. Though this point needs a lot of debate.

5. **Seshagiri's dish washer:-**
 - a. These are days when urban areas where both in couple will be going for jobs, house maids cant cater their needs up-to-mark. Neither is working as house maid is honorable profession. Dishwashers in market can't cater for India's needs. Hope this will be of a good use for everyone.

6. **Ms.Rao's innovation on many herbal solutions**
7. **Rajendra prasad's filter**
8. **Raju anna's story**

Co-Yatris

Seriously Summer walk without you all, I would consider employing an ambulance.

What can I write I am overwhelmed with words, it's like

**oohalanni paatale kanula thotalo
tholi kalala kavithale maata maatalo**

Briefly,

1. I will never ever be able to understand battery technology as much as I did while walking with Raani madam
2. Inspiration to write 1st poem from Ramya
3. Middle man's pain while speaking with Sandeep
4. Many pain points of a farmer while speaking with Brig.Ganesham
5. Lady's tongue plant thanks to Ramesh
6. Happiest couple in hut even with out having a penny with them
7. Can I ever be thankful enough for the discussions I had with anji reddy sir.
8. River bath in summer seriously???
9. Positivity of crack
10. About unknown and unknowable stranger
- 11.

Points to be worked on: -

1. Gober gas plants in villages.
 - a. We can have goshalas where group of cows can cater for milking needs of village and Gober gas is a byproduct.
 - b. Also crowd sourcing for having Gober plants in go-shalas can be a benefitable modal.
2. Narsimha's invention in western India, west Bengal etc...,
3. How can we take Chandra Sekhar's innovations to common people and make this win-win for all

Most humbling journey, one can ever go through. No one is playing their roles everyone is equal.
Refreshment from daily activity.

I know am still missing so much which I need to write, but who am I kidding, are words enough to describe it???
