

Dear sir,

It was my 8th Yatra, As always lot of happy moments and memories, I never thought villages exist without phone signals and internet these days, People living in these places are ahead of my expectations in sustainable living, Beautiful houses with kitchen gardens,best seed developing knowledge,Cattlemanagement,Advanced farming practices etc..

The way Kids welcomed us to their school and voluteered to host us reflects their culture and descipline,Some Kids are really talented they sung their traditional songs beautifully.

As you always mention that "Villages are made by God and Cities by people" I started believing in it.

We have come across few interesting native varieties like Bottle gourd,pumpkin& 16ft jowar,As planned will collect seeds from that place.

Yatra always gives me a better clarity on lot of things and also it raises many questions like 'Why Humanity course for Engineers?'

Happened to meet amazing people this time carried lot of inspiration to home.

Looking forward for the Next Yatra.

Thanks & Regards,
Dr.Durgaprasad,
Founder & CEO,
